**RE: Metaphysics Company Red Team Findings**

Dear Sir or Madam:

The purpose of this letter is to confirm the Red Team findings discovered from January 24, 2023 to February 14, 2023.

In this assessment, our Red Team operator conducted offensive security testing. Specifically, Mr. Buendia used our super-secret red teaming methodology to perform this security testing, and the following are the red team results for this exercise.

The red team findings included:

- Successful phishing campaign using a link against the HR department leading to compromise many endpoints.
- A keylogger was installed on the HR endpoints, and it was not detected.
- Credentials stored on LSASS were dumped using mimikatz and used to move laterally.
- Customer PII data was identified, and the files were exfiltrated using Dropbox.

If you have any further questions about the assessment, please do not hesitate to contact me at the number listed below.

Sincerely,

Guillermo Buendia  
Partner at Shibby Consultants
